Miller Research Potato Pest Management Workshop

Friday, February 5, 2010
Best Western Conference Center
800 N. Overland Ave.; Burley, ID

For all potato growers, consultants, and any others interested in potato pest management:

Miller Research LLC will be holding its annual meeting on Friday, February 5 at the Burley Best Western Conference Center to share new research on potato pest management. Presentations will discuss the pros and cons of using chemical and cultural practices to manage diseases and insect pests, along with a presentation on potato storage management.

There is no cost to attend this meeting.

Agenda:

8:30-9:00	Managing early blight and fungicide resistance management (Dr. Jeff Miller)
9:00-9:30	White mold control in potato (Dr. Terry Miller)
9:30-10:00	The reporting and control of late blight in southern Idaho (Dr. Jeff Miller)
10:00-10:20	Break
10:20-11:00	Managing potato diseases in storage (Dr. Nora Olsen, University of Idaho)
11:00-11:30	Rhizoctonia and Fusarium dry rot management in potato (Dr. Terry Miller)
11:30-12:00	Fungicides for controlling pink rot in potato (Dr. Jeff Miller)

Presentations will focus on new results from research trials relating to fungicide use rates, application timing and methods, and strategies for avoiding the development of fungicide resistance in pest populations. Most of the research discussed here was sponsored by the Idaho Potato Commission during the 2009 production season.

A total of 3 ISDA pesticide recertification credits and 3 CCA credits (PM) have been awarded for this meeting.

Please RSVP to Jeff Miller at 208-531-5124 or by email at: jeff@millerresearch.com so that we can get an accurate head count for room preparation purposes.

A copy of the presentations will be posted on our website (www.millerresearch.com) after the meeting is over.
